Get The Kids Outside With a Newturf Basketball Court

Newturf can either supply you or build your ultimate backyard basketball court. We can help you create a safe place for your family to laugh, play and get physical, a place that your family will never outgrow.

Our specialised playing surfaces will stand the test of time, they can even be designed for multiple sport activities. We will help your family build your dream basketball court, or multi-sport surface.

When building a backyard court, Newturf can help you design your game court to fit your backyard, activity level, and budget. We also ensure that your family receives a basketball court that not only looks terrific, but performs to your highest expectations and helps you avoid those costly unknowns that come from poor preparation.

For the home handyman we have the DIY 'Alleyoop" kits available in red, blue or green. Alternatively use one of our qualified installers to complete the dream for you.

No matter if you want a backyard basketball court where your kids can practice day and night to take their athleticism to the next level, or you want to know where your kids are by having the hangout house. It is time to give your kids a reason to turn off the video games and get outside and have some fun.
