About Newturf... Its a Great Australian Yarn

Newturf has been specialising in synthetic grass since 2002.

A family owned business, initially specialising in quality synthetic golf green installations before expanding into the construction of large scale commercial applications such as school ovals and sporting facilities.

Newturf saw an opportunity to develop synthetic grass products specifically for the landscape market, aimed at lawn and general purpose grass replacement.

The "Cool turf" range of lawn grasses was developed to combat Australia's high temperatures, independent testing has shown they are approximately 25-30% cooler than other products.

Newturf now has one of Australia's largest supply networks.

Newturf 10 great reasons to call us now:

- **Australia's most realistic synthetic grass**
- **Australian made and owned**
- **Australian manufacturer's warranty**
- **Superior hybrid emulsion backing**
- **Qualified and professional service**
- **D.I.Y. supply and installation service**
- **Never mow again**
- **Environmentally friendly**
- **Kid-friendly & pet friendly**
- **Drought proof**

NEWTURF PRODUCT GUIDE

Tru Lawn Cool Plus

Key Benefits

- Cool yarn – 25% cooler
- Multi-coloured sub pile
- 40mm blade length
- Very hard wearing
- Soft to touch
- Eight year warranty
- Rolls are 3.68m wide

Tru Lawn Premium

Tru Lawn Premium

Key Benefits

- Multi-coloured yarn – natural looking
- 40mm blade length
- Very soft feel yarn
- Ideal for shaded areas
- High yarn weight
- Eight year warranty
- Rolls are 3.68m wide

Field Cool Turf

Field Cool Turf

Premium Key Benefits

- 40mm blade length
- Natural dark green colour
- Multi-brown sub pile
- Hard wearing
- Cool yarn
- Eight year warranty
- Rolls are 3.68m wide

Gold Lush Cool Plus 35

Gold Lush Cool Plus 35

Key Benefits

- 35mm yarn length
- Cool yarn
- Multi coloured yarn
- Hard wearing
- Soft underfoot
- Eight year warranty
- Rolls are 3.68m wide

Kanga Turf

Kanga Turf

Key Benefits

- Fine, soft face yarn
- 35mm yarn length
- Suitable for medium traffic areas
- Ideal for shaded areas
- Multi-coloured sub pile
- Eight year warranty
- Rolls are 3.68m wide

Gold Lush Cool Plus 30

NEWTURF PRODUCT GUIDE

Gold Lush Cool Plus 30

Key Benefits

- Cool face yarn – 25% cooler
- Multi-coloured sub pile
- 30mm blade length
- Great value lawn product
- Soft to touch
- Eight year warranty
- Rolls are 3.68m wide

Esplanade 22

Esplanade 22

Key Benefits

- Budget Lawn product
- 22mm yarn height
- Multi-coloured yarn
- Eight year warranty
- Rolls 3.68m wide

Court Turf

Court Turf

Key Benefits

- 19mm yarn height
- Available in a variety of colours
- Sand-filled product
- Seven year warranty
- Rolls are 3.71m wide
- Ideal for multi-sports basketball, tennis, excellent bounce qualities

Pure Putt - 15KDK

Pure Putt- 15KDK

Key Benefits

- Ideal putting surface
- KDK yarn so ball will roll evenly
- Very hard wearing
- 15mm pile height
- Provides very 'true' and realistic putting surface
- Rolls are 3.68m wide

Cool Play

Key Benefits

- Cool Face yarn
- 23mm yarn height
- Very hard wearing – KDK yarn
- Ideal for children playgrounds
- Excellent for gym flooring or futsal/soccer pitches
- Available in a variety of colours
- Rolls are 3.68m wide

NEWTURF ACCESORIES GUIDE

Newturf designs, sources and supplies a range of products to assist you with the installation, care, and enjoyment of your grass.

Silica "Eco-fill".

Specially graded sand infill for synthetic grass. Comes in 25KG bags – recommended infill rates; ¾ bag per sq/m for 40mm grass, ½ bag per sq/m for 35mm grass, 1/3 bag per sq/m for 30mm grass and 1 bag per sq/m for basketball surfaces.

Qualtape Joining Tape

All purpose joining tape. Silver side is laid over the base with the white split side facing up. Suitable for all installations and easy to use. Rolls are 15m long x 100mm wide

Turf Pegs

Place around the outside of your lawn area, approximately 500mm apart slightly in from the edge. Green painted tops to blend in with the grass. Available in bags of 20 and 100 pegs

We can also supply cutting knives, trowels, glue and geo tape.

COOL LAWNS FOR LIFE

INSTALLATION GUIDE

follow these step-by-step instructions to install your Newturf lawn.

Using a rope or hose, layout the proposed area. Excavate the area to a depth of 80mm. Sprinklers may be capped or removed at this stage.

Lay 80mm of crushed roadbase and compact with vibrating plate. The level of crushed roadbase, when compacted, should be 15-20mm below "finished height" of surrounding edging/paving

Lay your Newturf lawn grass, making sure you start from one edge and roll out. Cut the overhanging quantities with a sharp knife. Remove the 'salvage', black strip, from both sides of the grass. This cannot be used to join the grass.

To join rolls/pieces of grass, use the Qualtape. Place the silver side of the qualtape onto base, this will leave the split white side facing up. Remove one side of the white cover and stick the grass to this, then repeat the process for the other side.

Once you have covered the complete area, simply nail all of the perimeters down at 500mm intervals using 150mm flat head nails. This must also be applied to the joining seams.

Top dress the grass with an even sprinkling of fine, dry "eco-fill" silica sand to a thickness of 15-20mm. A broom can be used at this stage to sweep in the sand evenly and to also brush the grass blades straight and vertical.

ATTENTION!

• Do not attempt to lift the grass by yourself. It is advised that the rolls be cut into manageable lengths before shifting. • Always run grass in one direction. • Ask for our formulae sheet for help to work out required amount of "eco-fill". • Caution: This product may become warm in direct sunlight. Please check the surface temperature before walking on it with bare feet. • The installation information has been supplied as a reference guide only. No representations or warranties are made regarding the installation information.

FAQ:

Does Newturf synthetic grass get hot?

Newturf has a range of grasses that utilise “cool” yarn. The “Cool Plus” grasses are approximately 25-30% cooler than other products.

Is Newturf child and pet friendly?

Absolutely. Newturf is manufactured to Australian manufacturing standards and is 100% child and pet friendly. Newturf has been installed in many child care centres and schools as well as commercial pet facilities such as the North Melbourne Lost Dogs home.

What maintenance is required?

Very little. Simply use a plastic rake occasionally to stimulate the fibres. Remove any large debris such as sticks and weeds. A little maintenance occasionally will keep your lawn looking like new.

Will the grass fade? What is the warranty and life expectancy of the grass?

No. All Newturf grass lines are UV stabilised and manufactured to the highest standards. Newturf lawn grass lines come with an 8 year Australian manufacturer's warranty. The life expectancy of Newturf synthetic lawns is 20 years.

Where is Newturf synthetic grass made?

All of our synthetic grass lines are made in Melbourne. This enables us to have the unique ability to maintain a hands-on approach in the quality control of our product.

What infill is used on top of the grass?

Newturf uses a fine grade of kiln dried silica sand. We've found this is the infill that provides the best finish. The infill plays two roles. Firstly it weighs the grass down. Secondly it provides support to the yarn, which helps the yarn stay upright. Without infill the yarn will lie flat and look fake.
